ETH.re - The Home Page is Already Designed

Business Description and Intended Use of the “eth.re” Domain

1. We are a securities analysis and data analytics firm. Our tools are for an institutional client

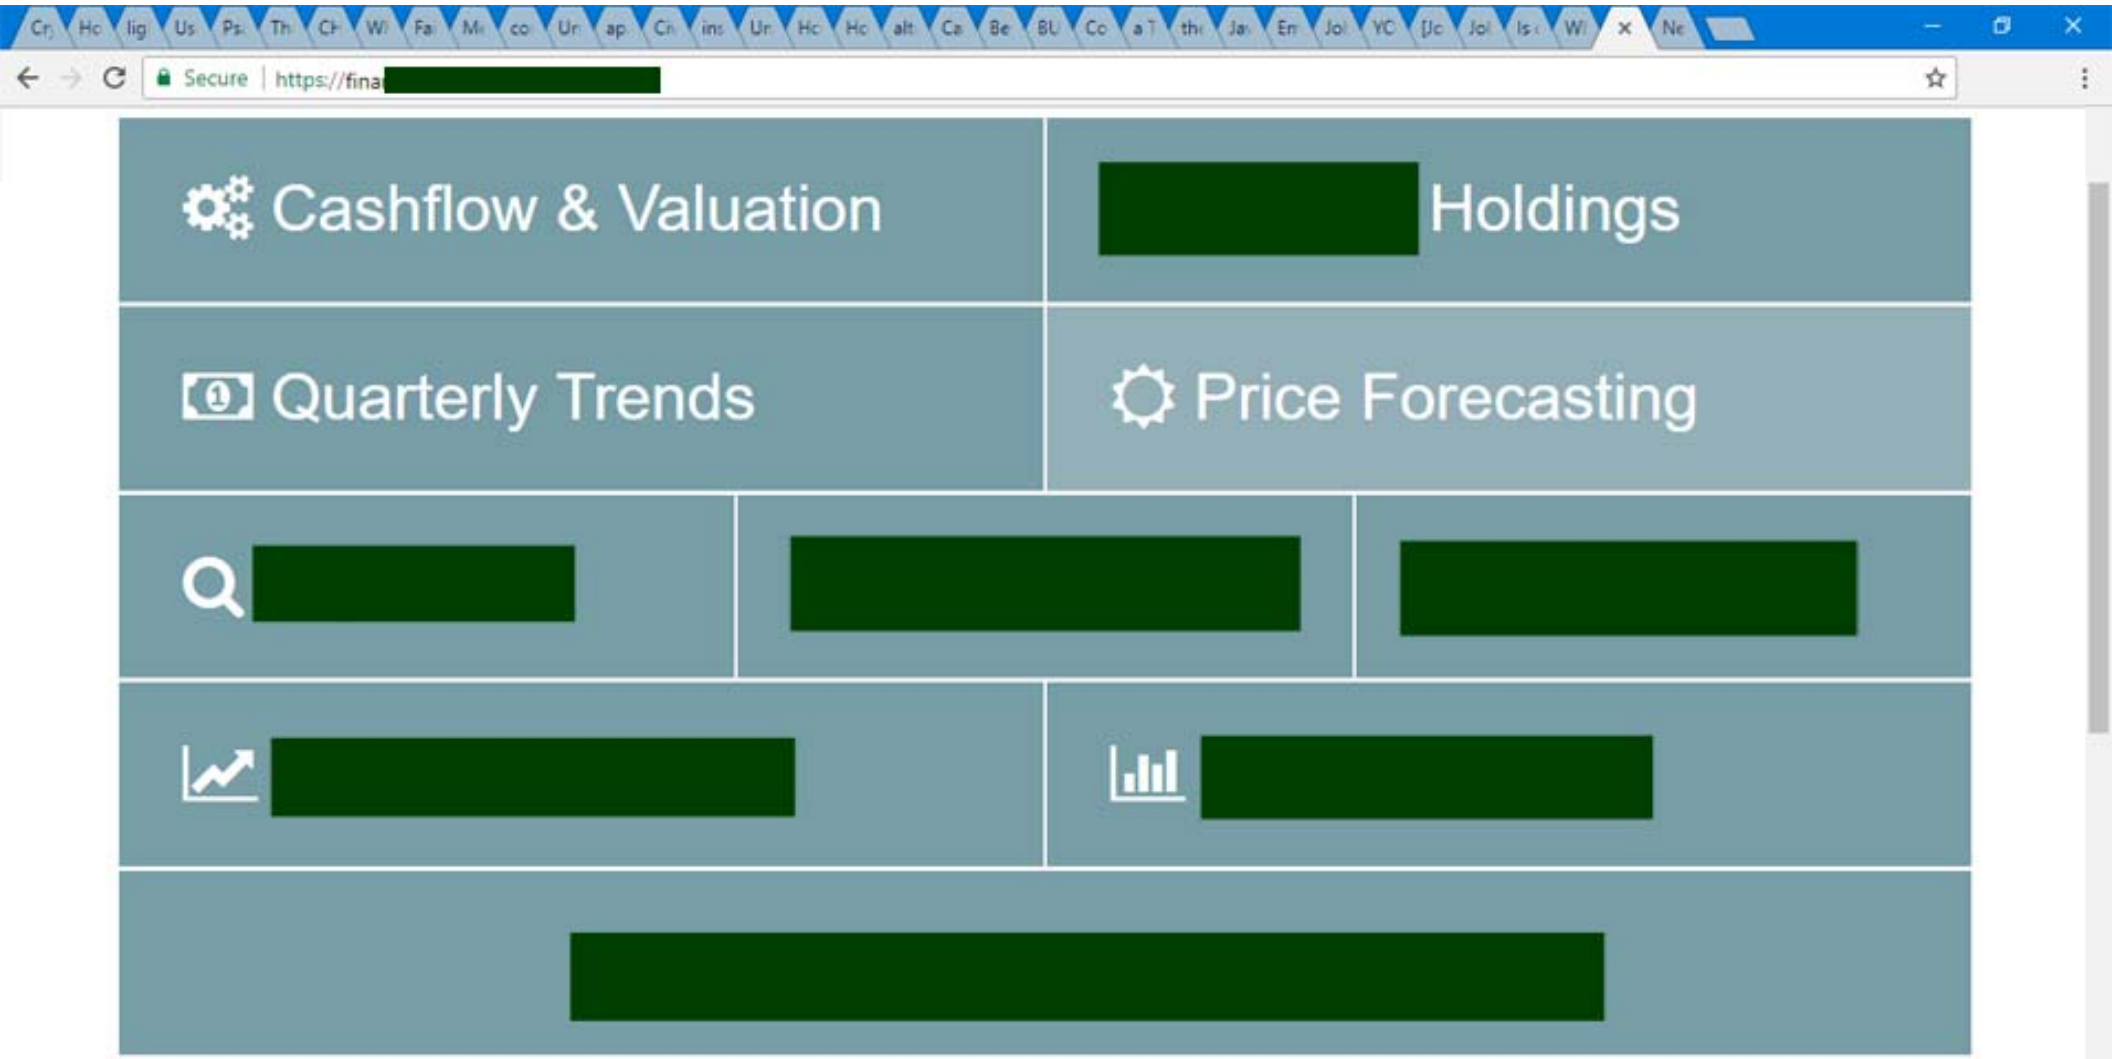
2. Our securities analysis tools are currently available online through an encrypted website (cf., page 3)

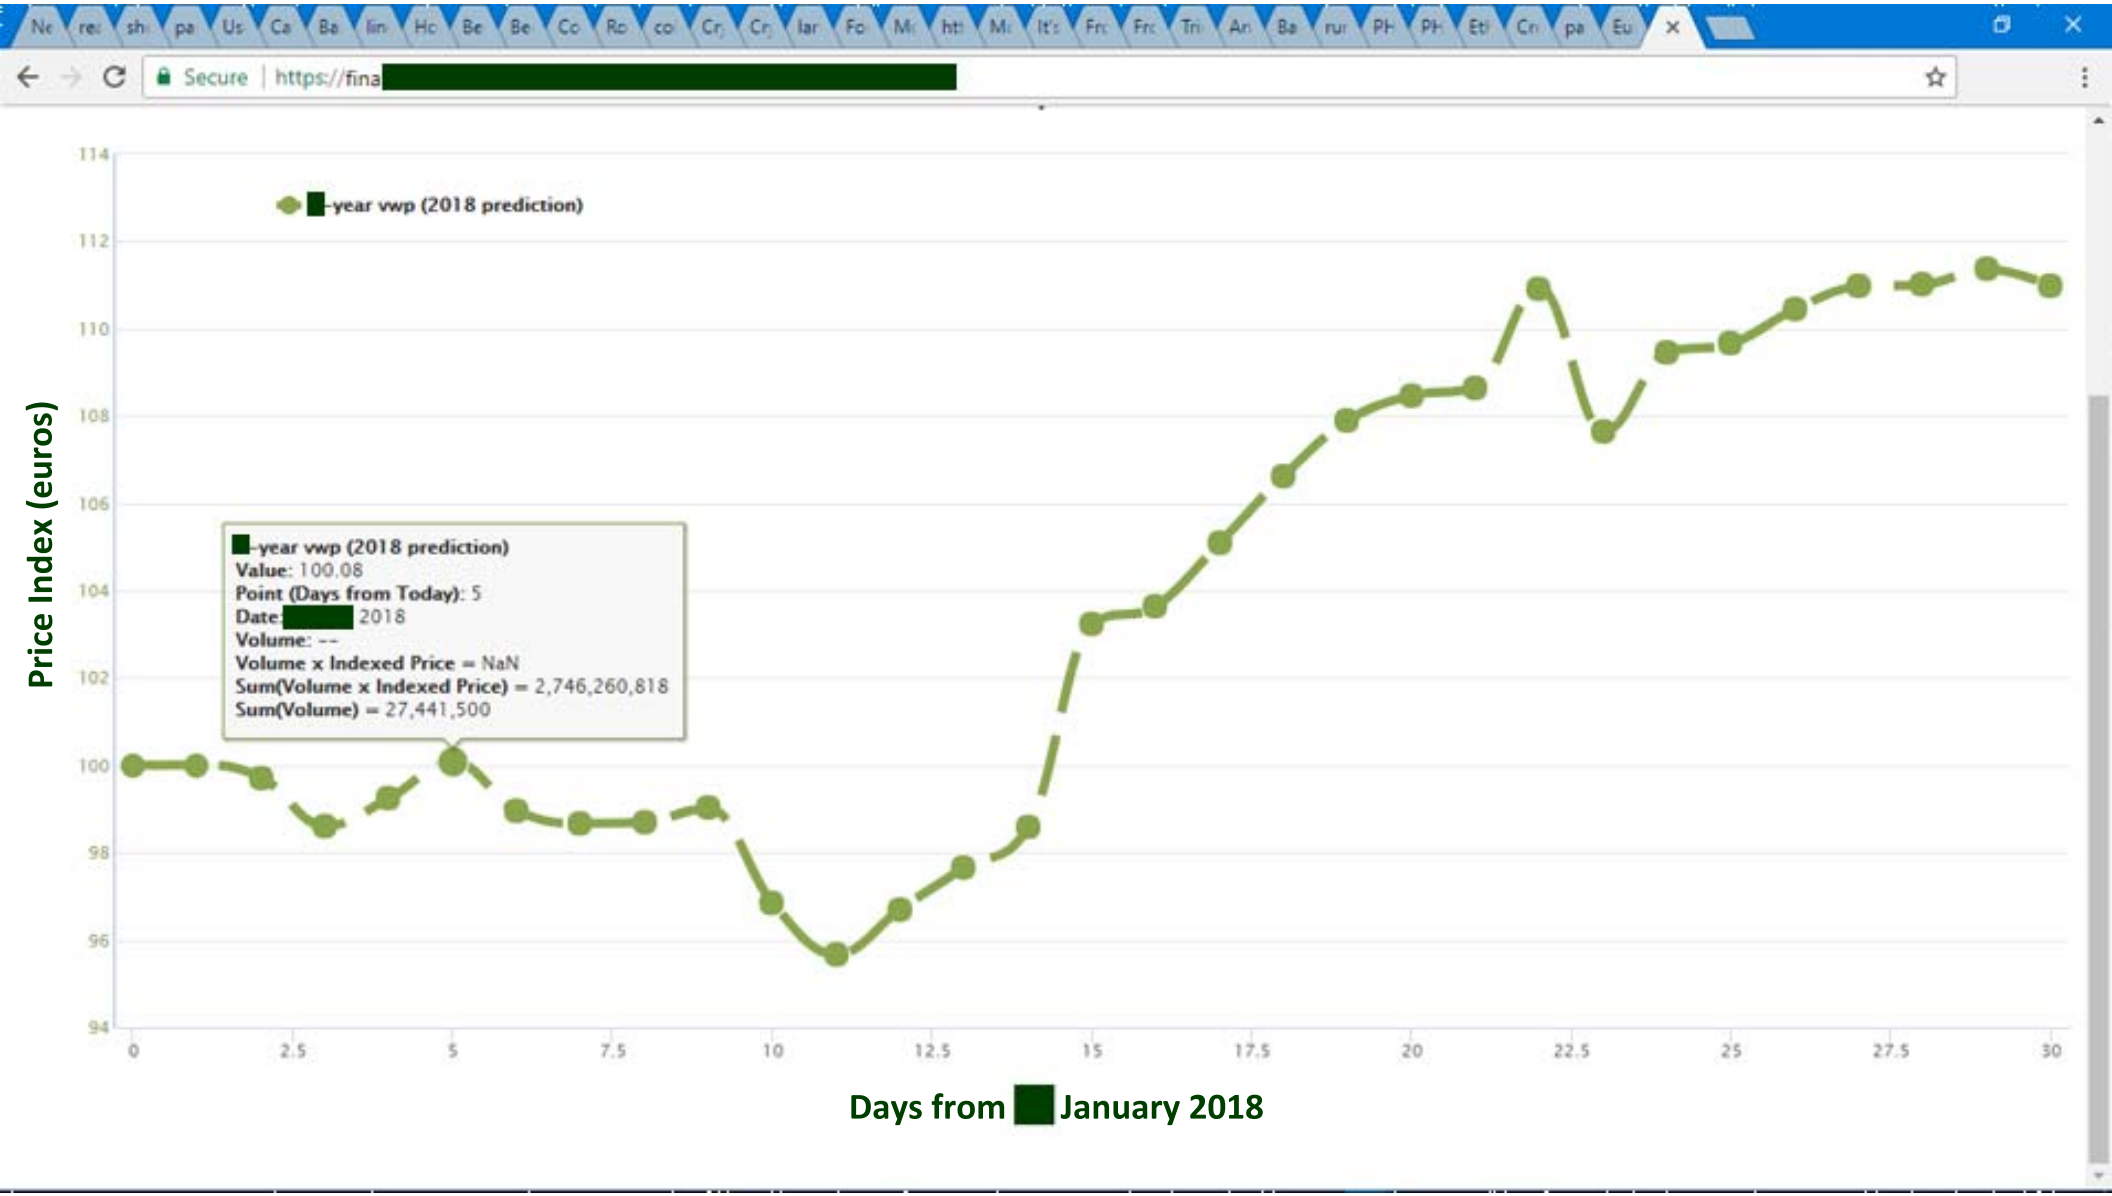
3. The homepage for the proposed site for “eth.re” is already designed (cf., page 1)

4. Ethereum (ETH) is the first blockchain network to have a built-in Turing Complete virtual machine. This means the Ethereum network may be used to accomplish any computationally intensive task. Any program can be deployed to the Ethereum blockchain

5. As such, our goal is to adapt our existing security analysis software (running on linux, javascript, et al) to run on the Ethereum network (cf., page 4)

Our Securities Analysis Toolbox Is Online and Available to Investors





Our Web-Based Price Forecasting Tool Was Deployed to the Web in 2016
